Subject: Salmonellosis Outbreak in Certain Types of Tomatoes

Date: June 27, 2008

Salmonellosis Outbreak in Certain Types of Tomatoes

FDA has issued a warning to consumers nationwide that an outbreak of Salmonella serotype Saintpaul, an uncommon type of Salmonella, has been linked to consumption of some raw red plum, red Roma, round red tomatoes, and products containing these raw tomatoes.

Update on the Outbreak

June 27, 2008: At this time, FDA recommends consuming raw red plum, raw red Roma, or raw red round tomatoes only if grown and harvested from the following areas that HAVE NOT BEEN ASSOCIATED WITH THE OUTBREAK:

Alabama

Alaska

Arkansas

California

Colorado

Connecticut

Delaware

Florida (counties of: Jackson, Gadsden, Leon, Jefferson, Madison, Suwannee, Hamilton, Hillsborough, Polk, Manatee, Hardee, DeSoto, Sarasota, Highlands, Pasco, Sumter, Citrus, Hernando, Charlotte)*

Georgia

Hawaii

Illinois

Indiana

Iowa

Kansas
Kentucky
Louisiana
Maine
Maryland
Massachusetts
Michigan
Minnesota
Mississippi
Missouri
Nebraska
Nevada **New!**

South Carolina
Tennessee
Texas
Utah
Vermont
Virginia
Washington
West Virginia
Wisconsin
Belgium
Canada

Dominican Republic

Guatemala

Israel

Mexican States (Aguascalientes, Baja California Norte, Baja California Sur, Campeche, Colima, Chiapas, Chihuahua, Distrito Federal, Durango, Guanajuato, Guerrero, Hidalgo, México, Michoacán, Morelos, Nayarit, Nuevo León, Oaxaca, Puebla, Querétaro, Quintana Roo, San Luis Potosí, Sonora, Tabasco, Tamaulipas, Tlaxcala, Veracruz, Yucatán, Zacatecas)

Netherlands

Puerto Rico

* Shipments of tomatoes harvested in these counties are acceptable with a certificate issued by the Florida Department of Agriculture and Consumer Services.

Consumers who are unsure of where the tomatoes are from that they have in their home are encouraged to contact the store or place of purchase for that information. If consumers are unable to determine the source of the tomatoes, they should not be eaten.

Consumers should also be aware that raw tomatoes are often used in the preparation of fresh salsa, guacamole, and pico de gallo, are part of fillings for tortillas, and are used in other dishes.

Types of tomatoes not linked to any illnesses are cherry tomatoes, grape tomatoes, and tomatoes with the vine still attached.

Since mid April, there have been 756 reported cases of salmonellosis nationwide caused by Salmonella Saintpaul, an uncommon form of Salmonella. At least 95 hospitalizations have been reported. Investigation of Outbreak of Infections Caused by Salmonella Saintpaul (CDC) [en Español]
